

CAPABILITIES

Source2Load Engineering and Consulting (S2L) is a fast-growing engineering firm with a solid reputation for combining technologically advanced engineering with value-based solutions. S2L provides full-service Mechanical, Plumbing, and Electrical (MEP) and Engineering Design for the Industrial, Commercial, and Residential sectors. We study the local requirements to ensure alignment and work with local inspectors throughout the project. The synergy has been successful resulting in on time, robust project deliverables.

- MEP Design and Commissioning
- Interior/Exterior Lighting Design
- Short Circuit/Coordination Studies
- Feasibility Studies
- Emergency/Critical Power Design
- Residential PV Solar Design
- Construction Cost Estimates
- Fire Protection Systems Design
- Lighting Photometrics Analysis
- Design/Build Services

DIFFERENTIATORS

- Free Initial Consultation
- Real Time Project Updates
- Low Cost Delivery/Certainty
- Fixed Fees
- Adaptable to Project Changes
- Speed in Delivery
- Team Cohesiveness and History
- Real Time Project Updates

“We would love to personally meet with you and learn more about your project while building a lasting, working relationship!”

- **Chad X. Slater, P.E.**

COMPANY DATA

- TX Licensed Firm #15125
- AL Licensed Firm #38149
- LA Licensed Firm #44427
- FL Licensed Firm #34057
- EIN#: 83-4132651
- DUNS#: 080618784
- Certifications: MBE, SBE, HUB, DBE
- NAICS Codes: 541310, 541330, 541340, 541350, 541410, 238220
- Over 45 years of combined experience
- Professional Liability: 2Mil/2Mil.
- General Liability: 2Mil/2Mil.

VALUE PROPOSITION

“We use the latest design software and technology to deliver exceptional solutions for your project needs. We establish the concepts and study alternate schemes for the most robust design. We strive to provide high quality, efficient, and timely engineering services to meet our clients’ needs.”
